

TOP THREE
REASONS
FOR CHOOSING NPS

TOP THREE REASONS FOR CHOOSING NPS AS YOUR PBM

1 > VALUE

- Services priced fairly with no hidden transaction fees
- Maximum Allowable Cost programs, discounted network, rebate programs
- Integrated 24-hour customer service center, nationwide pharmacy network, and complete Mail Order program

2 > INNOVATION

- Real-time reports, online administration and information
- Claim activity tracking for more effective plan modeling
- Custom designed plans and flexible plan management for increased efficiencies

3 > TRUST

- Alignment with the “risk” entity, not pharmaceutical manufacturers
- Data secure – NPS uses data for knowledge, not sales
- Doing business with integrity since 1992

. . . AND MORE

Snapshot Report

Using targeted database fields, the NPS system displays the plan’s prescription costs in a readable and precise series of documents – the “Snapshot Report”. This information is presented in an easy-to-understand manner that is instantly applicable to future cost modeling as well as projecting the impact of potential changes to the design of the plan. This is a valuable tool to identify trends and make constructive plan modeling decisions.

Clinical Programs

Our Clinical Program Services assist clients in the design, implementation, and management of drug utilization review programs, disease state management programs, pharmacy product conversion protocol programs, and a formulary program.

Communication to Members

More than at any other time in history, we believe individuals want – and need – to be educated on the cost of their own healthcare. Our Prescription Drug Explanation of Benefits (EOB) report assists members in determining the level of accuracy of their claims plus providing alternative drug products information that may even offer savings to the employer plan. This report is sent right to the member’s home.

WHO IS PTI?

In 1992 a group of pharmacists in Omaha, Nebraska conceived a solution to the inefficiency and high cost of pharmaceutical healthcare. Pharmaceutical Technologies, Inc.® (PTI) was formed with an idea that was surprisingly simple: change the way managed pharmaceutical healthcare operates. Today PTI is the parent company under which many products have been developed to help eliminate the confusion and inefficiencies within this industry.
